Power-One Strengthens Renewable Energy Sales and Service Team in Germany

Camarillo, CA – April 30th, 2008 – Power-One, Inc. (Nasdaq:PWER), a leading provider of power conversion and power management solutions, is pleased to announce the hiring of three new people to strengthen its presence in the PV inverter business in Germany. Pictured below is the team during a recent training meeting at its German headquarters in Freiburg.

Mr. David Lowen, Power-One's Renewable Energy Sales Director commented, "We are all very pleased to welcome the new members of the Power-One Renewable Energy Team, these people will further strengthen our ability to provide world-class service to our customers."

Power-One's Aurora® PV inverters are available in configurations from 2kW to 300kW, and feature high-speed maximum power point tracking channels and industry-leading efficiencies, to optimize energy harvesting across a wide range of operating conditions. These products are delivered pre-configured and pre-tested; significantly reducing on-site installation wiring and testing.

Power-One designs and manufactures energy-efficient power conversion and power management solutions for alternative/renewable energy, routers, data storage and servers, wireless communications, optical networking, medical diagnostics, military, railway controls, automated/semiconductor test equipment, and custom applications. Power-One, with headquarters in Camarillo, CA, has global sales offices, manufacturing, and R&D operations in Asia, Europe, and the Americas.
