**Aurora[®] PVI-Central 50kW and 100kW Inverters Gain UL1741 Approval;
Now Available for Sale in North America**

Camarillo, CA – December 7th, 2009 – Power-One, Inc. (Nasdaq: PWER), a leading provider of renewable energy and energy-efficient power conversion and power management solutions, announces the availability of its PVI-Central 50kW and 100kW grid-tie, commercial-grade photovoltaic inverters for sale in North America. The inverter models, approved to UL1741, are known as the PVI-CENTRAL-50-US and PVI-CENTRAL-100-US, and employ 50kW and 100kW subracks in a scalable architecture that facilitates application-optimized inverter solutions from 50kW to 300kW.

Offering industry-leading features and field-proven reliability, the PVI-CENTRAL-50-US and 100-US are installer friendly, providing reverse polarity protection, RS-485 communication interfaces, and a front-panel LCD display to provide real-time updates for critical operating parameters.

These grid-connected products, having already demonstrated acceptance in European markets, provide a unique combination of high efficiencies (up to 95.8%; 95% CEC), long service life, and competitive initial acquisition costs, significantly increasing return on investment in photovoltaic installations.

The PVI-CENTRAL-50-US and 100-US data sheet for North America is available for download at:
